Team Swydo

## Sample Report

Creating a Google Search Console report with Swydo is super simple. With a click, you can connect to a data source, like a Google Search . Then select the information you want to include through pre-defined KPIs values or widgets (table/charts) - or create your own.

Widgets can be refined through settings like segmentation, filtering and by chart or table, and you can further customize your report - and provide additional insight - through text and image/screenshot widgets. And every report can be saved and easily re-used for other clients. Best of all - you can combine data sources in one report to provide comprehensive insights across all paid advertising campaigns, SEO, and website analytics.
